

ARI Simulation unveils its 2016 integrated simulation suite of products for the maritime sector in ‘Maritime India Summit 2016’

The suite of simulators covers the complete range of operations for - Ports and Terminals, Logistics, Vessels for Deep Sea, Inland Waterways, Coastal trade & Dredging, Offshore, Fishing and more. This places ARI in a unique position to provide a simulation framework for Port and Feasibility studies and the Sagarmala initiative

The only company to display simulation training products manufactured indigenously across a series of stands during the event

Minister of Transport, Shri Nitin Gadkari at the ARI full mission ship manoeuvring simulator at the DGS stall at the Summit.

Mr. Shравan Rewari, MD & CEO, ARI Simulation said, “ARI is proud to have the opportunity to exhibit its products at the DG Shipping, IMU, IWAI, SCI and DP World’s stalls at the India Maritime Summit exhibition. It is always inspiring to witness our clients showcasing the ways in which they use our products to improve their businesses. IMU, IWAI, SCI and DP World are all organizations who have incorporated ARI simulator technologies into their day-to-day activities, whether for training, skills development, competency assessment or orientation to new challenges. We are pleased that DG Shipping has provided ARI a platform to showcase our state of the art simulation technologies that are indigenously designed and developed in India for the Maritime sector.”

Minister of Transport, Shri Nitin Gadkari with Shравan Rewari, MD & CEO, ARI Simulation

“India is today the second largest global provider of manpower to the shipping industry and Indian seafarers have justly earned a reputation – across the world – as consummate professionals with extremely high levels of competency. ARI Simulation plays a role in the provision of sophisticated tools with which to build these skills and do our part to ensure the continuing success story of the Indian seafarer”.
